

# Out-of-hours work

## Adderton Road, Telopea

### Parramatta Light Rail Stage 1 project

4 March 2024 – IW537

Transport for NSW acknowledges the Dharug people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The Parramatta Light Rail is one of the NSW Government's latest major transport infrastructure projects being delivered to serve a growing Sydney.

Parramatta Light Rail Stage 1 will connect Westmead to Carlingford via the Parramatta CBD and Camellia. It is expected to open in mid-2024.

Following completion of the tracks and stops, the testing and commissioning of the light rail vehicles and the network is continuing.

Minor finishing work on the major infrastructure is being completed along the alignment by **Parramatta Connect**.

#### Where and what work are we doing?

Work to reinforce a grass embankment will be carried out within the rail corridor at **Adderton Road, at Winter Street, Telopea**. Work will include temporarily removing a section of fencing.

See the map overleaf for the work location.

#### When we'll be working

The work will take place between **Monday 11 March 2024** and **Friday 15 March 2024**.

Work will be carried out on **three night shifts**, between **8pm and 6am**. Noisy night work is carried out for a maximum of four nights in a seven-day period.

See the work schedule at [parramattalightrail.nsw.gov.au/weekly-works](http://parramattalightrail.nsw.gov.au/weekly-works).

#### Traffic and pedestrian access

Temporary pedestrian and traffic control will be in place as required to ensure safe movements around the work zones.

Access for waste collection and emergency services will be maintained at all times.

Please follow the direction of traffic controllers and signs, proceed carefully and allow extra travel time.

#### What equipment will be used?

Equipment will include, but is not limited to, traffic barriers, excavator, compactor, hand tools, power tools, lighting, trucks and light vehicles.

#### What will this mean for you?

There will be some noise associated with this work, which can be loud and disruptive.

Some of the ways we manage this is by:

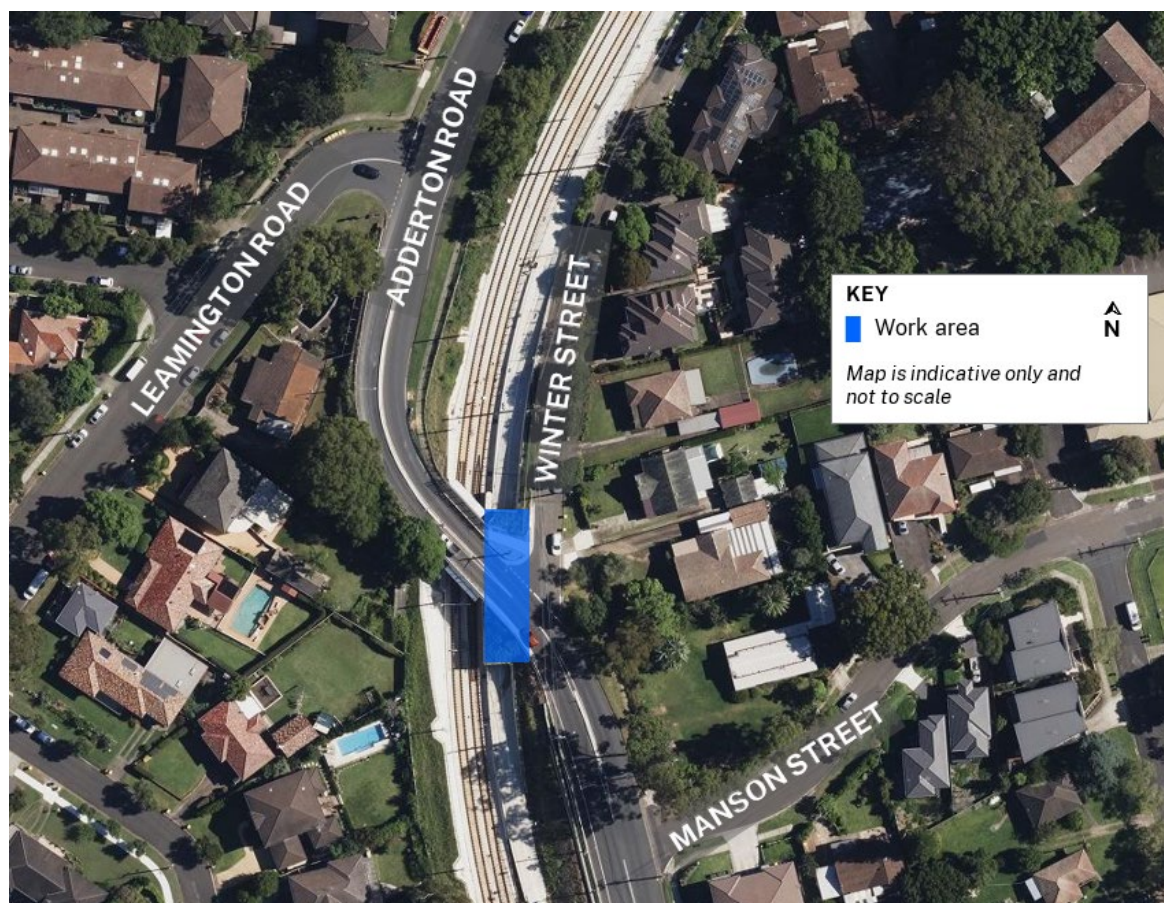

- using non-tonal reversing beepers blankets
- monitoring and reviewing noise levels
- consulting with directly affected residents
- turning off equipment when not in use.

#### Safety around light rail vehicles

Whether you're walking, riding a bike, driving or catching public transport, it's important to stay alert and be aware of your surroundings.

Visit the Parramatta Light Rail safety page at [www.parramattalightrail.nsw.gov.au/safety](http://www.parramattalightrail.nsw.gov.au/safety) to learn more about staying safe around light rail vehicles.
